

Computer Security in the Real World

What we do and why you care

Who's this guy?

Chris Newman, BS from Cal Poly in CSc in '02

- 11 years with US Government Defense Contractor
 - 4 years coding defense
 - 4 years coding offense
 - 3 years “security research” pentesting
- 5 years with VMware
 - 2 years pentesting
 - 3 years managing pentesters “Security Engineering Manager”
- newmanc@vmware.com

Security**

Defensive Coding

- ✦ Free isn't Free
 - ✦ Open Source should be treated like a puppy, not a toilet
- ✦ Assume You're Owned
 - ✦ Contain compromises by lowered privileges and defending in depth
- ✦ All Input is Evil
 - ✦ Use Abuse Cases to test your code with bad input
- ✦ If You Don't, They Won't
 - ✦ Don't expect customers to harden systems
- ✦ Use the right framework that removes whole classes of attack
- ✦ Don't assume good behavior (Hardware, OS, Users)

Coding Defense Tools

Where

- Symantec
- McAfee
- VMware
- Microsoft
- FireEye
- Top 500 cyber security companies

What

- Antivirus
- Firewalls
- Network tunnels
- Hypervisors
- Phishing detection
- ...

Incident Response

Where

- ✦ Every organization with a network
- ✦ Consultancy

What

- ✦ Forensics
- ✦ Mitigations / Fixes
- ✦ Short or Long term engagement

Penetration Testing

Where

What

- ✦ NCC Group
- ✦ IOActive
- ✦ Rapid7
- ✦ Dozens more...
- ✦ Zero Days
- ✦ Travel
- ✦ Super short engagements

Bug Bounty

Where

- ✦ Your House
- ✦ Bugcrowd
- ✦ HackerOne
- ✦ Direct Bug Bounties
 - ✦ MS
 - ✦ Google
- ✦ More...

What

- ✦ Zero Days
- ✦ “Free time”
- ✦ Read the contract!
- ✦ How do you get the target?
 - ✦ IoT device?
 - ✦ Car?
 - ✦ Expensive software?
 - ✦ Test servers?

Coding Offense Tools

Where

What

- ✦ Governments
 - ✦ NSA, CIA, NRO, FBI
 - Military, etc
- ✦ Government contractors
- ✦ Police/Law Enforcement
- ✦ Zero Days
- ✦ Remote Access Tools
- ✦ Medium-term engagements

Internal Security Testing

Where

What

- ✦ Every company who ships software
- ✦ Every company who runs an online service

- ✦ Zero Days
- ✦ Mitigations / Fixes
- ✦ Long term engagement

Resume Fodder

- Capture The Flag (CTF)
- Internships
- Common Vulnerabilities and Exposures (CVEs)
- OSS submissions
- Conferences (Student scholarships available to most)
- Rewarding your use of free time is inherently classist and sexist but sadly common
- Senior Projects/Master's Thesis
- Independent research with a professor
- The right classes: Security, Compilers, OSes, Networking

Interview Prep

- ✦ Reverse Engineering: challenges.re
- ✦ Code challenges: leetcode.com
- ✦ Code review: be able to find bugs in any language on your resume
- ✦ Python
- ✦ Books
 - ✦ Hacking: the Art of Exploitation
 - ✦ Web Application Hacker's Handbook 2
 - ✦ Practical Malware Analysis
 - ✦ The Art of Software Security Assessment
